Deepak yadav

Fueling Medical edTech Startup || Providing Free Development and DSA Help to Those in Need || Full Stack Developer(python(django) + MERN) || Transforming Ideas into Reality || 1000+ DSA question || LPU Batch Topper

Gurugram, Haryana, India

Summary

Hey there! , I'm all about using my skills to make a difference in the world. As a Full Stack Developer, I love taking ideas and turning them into something real and awesome, using my mad skills in Python (Django) and MERN.

But I'm not just about coding and making things look pretty. I'm also super passionate about helping others. That's why I'm always down to give some free development and DSA (Data Structures and Algorithms) help to anyone who needs it. I've done a pretty much of over 1000+ DSA questions, so if you're struggling with that stuff, hit me up!

I have been to university's hall of fame for scoring highest CGPA , and I've always been driven to be the best at whatever I do. I'm a hard worker who's always eager to learn and grow, and I'm always looking for new opportunities to make a positive impact on the world.

So if you're looking for a kick-ass Full Stack Developer who's also a total team player, hit me up! I'm always down to chat and see how I can help bring your ideas to life.
